

# ACROVYN® CRASHRAILS

Acrovyn crashrails provide impact protection just where you need it and will dissipate impact energy along the length of the hidden bumper cushions, without compromising the fixing into the walls. The strong durable covers are available in the wide range of Acrovyn colours, and end caps can be matching or contrasting colours. Choose crashrails from 57mm to 204mm in height and with different stand-offs from the wall.

## SCR80M, BCR80M, ECR80M(81) and ECR80M(120)

Heavy duty crashrail in curved profile for extensive impact protection

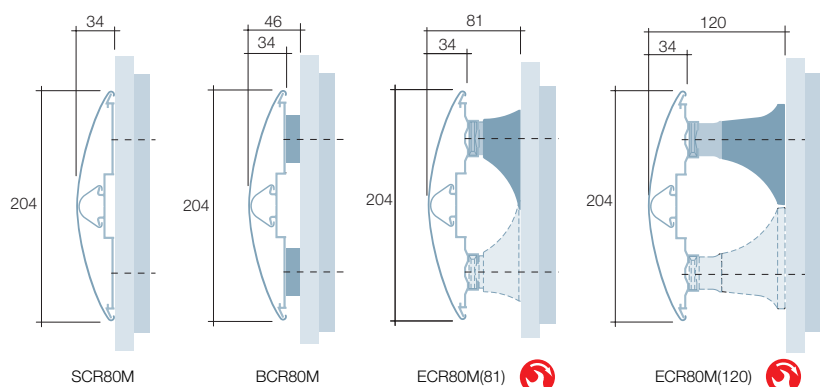

### Dimensions

Fix at max. 600mm centres  
Stock lengths 4.0m

### Features

- Acrovyn cover over continuous aluminium retainer
- Free-floating design flexes on impact
- Continuous Acrovyn regrind shock-absorbing bumper
- Four mounting options for varying stand-offs
- Accessories: Acrovyn End Caps, External Corners and return to wall End Caps for extended options (ECR80M)
- Available in all Acrovyn Profile colours

# PROTECTION IN STAINLESS STEEL

Stainless steel wall protection provides a sleek, smooth solution for crisp interior wall protection in hotel and retail environments. Suitable also for areas where hygiene and cleanliness are of paramount importance such as kitchens, pharmaceutical areas and laboratories.

Stainless steel wall protection is available in Grade 304 as standard.

## CRC150 and CRC200

Severe duty stainless steel crashrail fitted to the wall and suitable for ultra-clean and sleek environments

severe duty

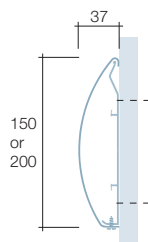

### Dimensions

Fix at max. 400mm centres

Lengths to cutting schedule (max 3.0m)

### Features

- Stainless steel crashrail cover over continuous aluminium retainer
- Available in two depths
- End caps welded to surveyed rail lengths
- Dull polished as standard

CRC150 / CRC200

## LLRSS

Heavy duty low level stainless steel rail ideal for protecting fully glazed corridor walls

severe duty

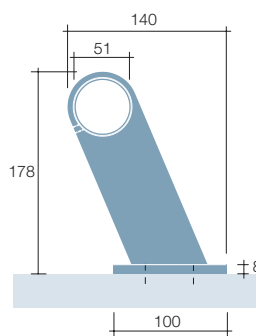

### Dimensions

Fix at max. 1000mm centres

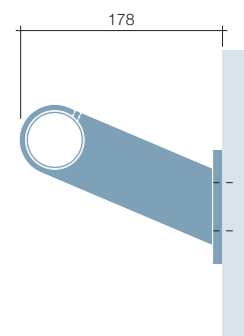

Stock lengths 3.0m

### Features

- Stainless steel tubular rail on stainless steel brackets
- Suitable for floor or wall mounting
- Accessories: stainless steel Internal/External Corners, return to wall End Caps and End Stops
- Satin finish as standard

LLRSS (floor mounted)

LLRSS (wall mounted)

House of Fraser, Birmingham

Matthew Boulton College, Birmingham

**PP76**

Stainless steel posts to divert traffic in order to protect features, corners and doors

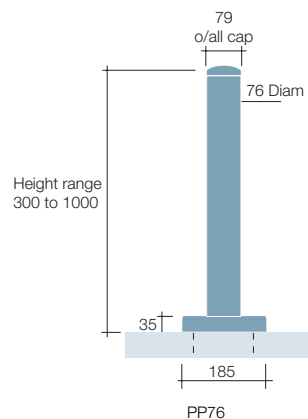

severe duty

**Dimensions**

Standard height 600mm  
(min. 300mm, max. 1000mm)

**Features**

- Stainless steel posts
- Designed for floor mounting, with base plate cover to conceal fixings
- Satin polished as standard

**40A, 75A, 40AB and 75AB**

Heavy duty stainless steel surface mounted corner guards

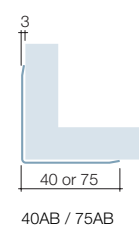

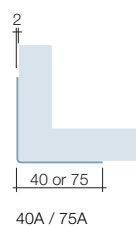

heavy duty

**Dimensions**

Stock lengths 3.0m

**Features**

- 1.6mm thick stainless steel corner guards
- AB models have slightly cranked edges to provide 1.5mm (approx) void behind corner guards to accommodate wall irregularities
- Both models are available in 40mm or 75mm sizes
- Installed with construction adhesive
- Dull polished as standard, other finishes available to special order

# PROTECTION IN RUBBER

C/S Acrovyn Rubber Crashrails, Bumpers and Corner Guards have excellent shock-absorbing and weather resistant qualities, and are the ideal solution for back-of-house and delivery area wall protection.

These areas are liable to damage from vehicular traffic and Acrovyn rubber profiles offer robust protection, which is suitable for fixing directly to concrete, steel, masonry and timber.

## 200W30 and 200W50

Severe duty surface mounted 200mm deep rubber crashrails

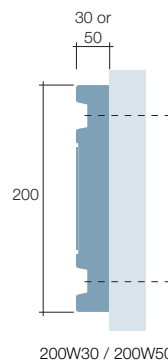

### Dimensions

Fix at max. 300mm staggered centres

Stock lengths 3.0m

### Features

- EPDM rubber crashrail
- Suitable for internal and external applications
- Available in two thicknesses to suit project requirements
- Optional light reflective, self adhesive tape insert
- Can be fixed to circular columns using steel binding

## 150W20

Slim-line severe duty rubber protection with concealed fixings

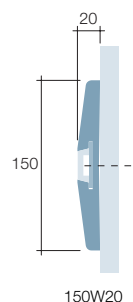

### Dimensions

Fix at max. 400mm centres

Stock lengths 3.0m

### Features

- EPDM rubber crashrail
- Snap-in cover strip

Bristol Municipal Car Park

Co-Op, Colchester

### 75D and 100D

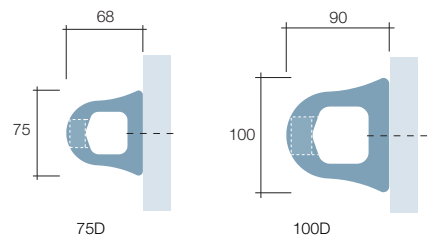

Severe duty D-section rubber guards for indoor and outdoor use

### Features

- EPDM rubber crashrail
- Available in two sizes to suit project requirements
- Rubber end plugs and bolt bung covers available

### Dimensions

Fix at max. 400mm centres

Stock lengths 3.0m

### 60B

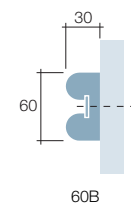

Discreet B-section heavy duty rubber guard suitable for internal and external applications

### Features

- EPDM rubber guard
- Continuous aluminium fixing strip

### Dimensions

Fix at max. 400mm centres

Stock lengths 3.0m

### 75C and 100C

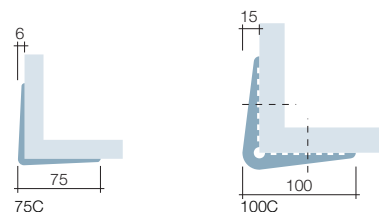

Surface mounted rubber corner guards offer excellent protection to corners in areas requiring heavy duty protection

### Features

- Manufactured from EPDM rubber
- Available in 75mm and 100mm sizes
- Installation using construction adhesive and/or proprietary fastenings
- 100C model is grooved on the internal surface to effect greater adhesion

### Dimensions

Mechanical fixings at max. 300mm staggered centres

Stock lengths 3.0m
